Overview

MSE Railcar Services' Moss Point, Mississippi facility is a certified full-service railcar repair and maintenance center with direct access to four Class I railroads. The shop services a wide range of freight and tank car types and accepts inbound unit trains.

Equipped for general freight car repair, tank car repair and qualification, cleaning, and wreck work, Moss Point combines on-site repair capacity with available storage spots to keep customer fleets moving efficiently and reliably.

MSE Railcar Services

MSE Railcar Services is a strategic partner providing immense value to long-haul logistical operations throughout the Southeastern United States. With connections to four Class I railroads, MSE delivers logistical solutions reaching across the continent.

Backed by the Mississippi Export Railroad, MSE offers full-service railcar maintenance, tank car qualification, mobile repair services, and fleetwide management solutions designed around each customer's operational goals.
